

### BIS32W

#### Digital input module

#### Functions

- Digital input module for RTU/PLC Atlas family
- Digital signal acquisition – alarms, apparatus states, statuses
- Maximally 64 modules per RTU
- LED indication of active inputs and module operation/fault

#### Application

Digital input module BIS32W acquires digital signals from the process for internal processing by the controllers Atlas Max®, Atlas XP2 and Atlas MTU.

#### Design

Double Eurocard (233,4x162,5mm). Front mask dimensions: 262x30 mm.  
Module is designed for standard 19" rack.

#### Terminal connection

Number of inputs	32
Terminal connection	In groups of 8 inputs
Interface type	Optocoupler
Galvanic isolation	2 kV between inputs and electronics

#### Technical specification

##### Input voltage

- nominal value	V <sub>s</sub> = 24/48 VDC
- logical "0"	0 - 0.8V <sub>s</sub>
- logical "1"	0.9V <sub>s</sub> - V <sub>s</sub>

##### Input current

Power supply for electronics	2 mA per input
	5VDC

- allowed variation	+/-5%
---------------------	-------

##### Acquisition rate

1 ms
------

##### Power supply for digital inputs

24VDC/48VDC
-------------

- allowed variation	75% - 150%
---------------------	------------

- power consumption	100mA@5VDC
---------------------	------------

##### Temperature

Operational (standard)	0 to 50°C
------------------------	-----------

##### Relative humidity

5 to 95% non condensing
-------------------------
