

KAC 24 – AC / DC converter 24VAC/24VDC

Power supply module

Basic functions

- It provides 24VDC for the power supply of the MMS family module if the input voltage is 24VAC.
- No galvanic isolation.

Application

KAC 24 module is used for power supply of the MMS family devices if the input voltage is 24 VAC.

Design

Cabur CH boxes (Dimensions WxDxH 24x85x121mm).

Connections

Input 2-pin module on the bottom side, exit 4-pin module on the bottom side.

Technical specifications

Operating temperature	0-50°C
Operating humidity	5 to 95% RH
Power supply	24VAC
Output power	24W (24V, 1A)

PIN Layout

CON.1

PIN	Name	Description
1	24VACa	Input power
2	24VACb	Input power

CON. 2

PIN	Name	Description
3, 4	+24V	Output power +
5,6	GND24	Output power -
