# PRODUCT END OF LIFE ANNOUNCEMENT

To whom it may concern,

We're using this opportunity to inform you about obsolescence date of specific products from the IMP-Automatika production or sales program:

1. Product family: **Atlas**
  - I. Model: **Atlas Max RTU/PLC**
  - II. First installation date: **/**
  - III. Official EOL date: **February 2022**
  - IV. Support and maintenance end date: **February 2023**
  - V. Next generation model: **Atlas Max RTL RTU/PLC product of appropriate characteristics**

Listed product(s) have been in service for a long time and their further production, service and support are not recommended, profitable, and in some cases not even possible; due to the impossibility of acquiring certain components necessary for production on world market due to technological progress. For all products for which IMP-Automatika announces obsolescence, an adequate replacement of the new generation is available, which has been carefully selected and/or designed to meet the functionality and bring improvements compared to the previous generation model, follows technological trends and is in parallel exploitation for a while with previous generation models.

We recommend that you take this into account when planning the maintenance of existing and preparing new projects.

Product purchases will be limited by stock availability, while maintenance will continue up to the stipulated date.
