

Technical specification

Patent Office consultancy - Preparation of a new European Patent application

Characteristics:

Patent research:

- Conduct a comprehensive search for existing patents to identify any that may be similar or relevant. Explore potential prior art and the likelihood of patentability.

Claims Definition

- Develop and define the most suitable claims based on the results of the patent research and the technical features of the developed device.
- Ensure the claims are broad enough to protect the invention while specific enough to meet patent requirements.

Drafting Specifications

- Write a draft of the technical specifications

Entity Status Determination

- Assess and determine the appropriate entity status for the application.

Documentation Preparation

- Prepare the draft of documentation required for a European Patent application

Delivery time: maximum 2 weeks
